PUBLISHABLE EXECUTIVE SUMMARY

The public EEPOS website on www.eepos-project.eu is the central platform for the dissemination of project relevant information. This document describes the structure and first contents of the EEPOS project website and reports on its implementation, maintenance and planned further development.

The contents of the EEPOS website will be updated continuously. Up-to-date information on the project, its partners, results, publications, dissemination material as well as related initiatives and external activities will be available on the website throughout the duration period of the EEPOS project. Furthermore, project relevant events and news will be announced on respective subpages and in news and events information boxes shown on any subpage of the EEPOS website. All public project deliverables will be available for download. Furthermore, links to free web-based forums and collaboration spaces for communication with external stakeholders and to the EEPOS LinkedIn group are provided.

The screenshot shows the EEPOS project website homepage. At the top, the logo 'eepos' is displayed in a stylized font, followed by the tagline 'Energy management and decision support systems for Energy POSitive neighbourhoods'. Below this is a navigation bar with tabs for 'EEPOS', 'Publications', 'Events', and 'Energy Management'. A search bar is located in the top right corner. The main content area features the project title 'EEPOS Energy management and decision support systems for Energy POSitive neighbourhoods'. The text describes the project as a research and development effort funded by the European Commission under the 7th Framework Programme, aiming to realize energy positive neighbourhoods. It mentions field tests in Espoo, Finland, and Langenfeld, Germany, as well as a virtual demonstration study in Asparrena, Spain. A diagram illustrates the system architecture, showing the interaction between different energy domains (ICT, WFS, and Energy) and their respective components. Below the text, logos of the project partners are listed: VTT, FATMAN, YIT, AIT, DERlab, ennovatis, Solintel, and Asparrena. On the right side, there are two sections: 'News' with a recent entry 'Kick-Off Meeting in Espoo, Finland Oct. 22 - Oct. 23, 2012' and 'Events' with an entry 'Conference and exhibition "ICT for sustainable places" Sept. 9th-11th 2013'. The footer contains copyright information (© 2012 EEPOS), links for 'IMPRINT', 'CONTACT', and 'DISCLAIMER', a key icon, and a statement that the project is supported by the 7th Framework Programme of the European Commission, accompanied by the European Commission logo.
